

# FIRE INCIDENTS

ESO Fire Incidents eliminates the manual task of re-entering data from EMS calls to meet NFIRS requirements so your members can focus on more important duties.

## NO MORE REDUNDANT DATA ENTRY.

Why waste time inputting the same information multiple times for medical aid calls? With ESO Fire Incidents, you'll never again have to complete both an EHR report and an NFIRS report for the same call.

## FAST TO LEARN — AND EVEN FASTER TO USE.

Designed specifically for firefighters, Fire Incident's interface is intuitive and straightforward. Your members will appreciate both its ease of use and speed.

## AUTOMATED NFIRS SUBMISSION.

Take the hassle out of submitting data to your state — ESO does the work for you automatically.

## IMPROVED NFIRS REPORT ACCURACY.

Entering data manually is just asking for errors in transcription. With integration to EHR, data is imported automatically, improving the accuracy.

## DOCUMENT CONFIDENTLY WITH PROGRESSIVE VALIDATION.

Why struggle to figure out what required elements are missing? Fire Incident's exclusive progressive validation sequence leads the user through the report. If there's an error, the user simply clicks to open the field that has the issue, fixes it, and moves on.

## FROM A COMPANY YOU TRUST.

At ESO, we understand how first responders work because we've worn the uniform ourselves. Not only are our products designed for you — you'll feel like they were designed *by* you.
