

ASSET MANAGEMENT

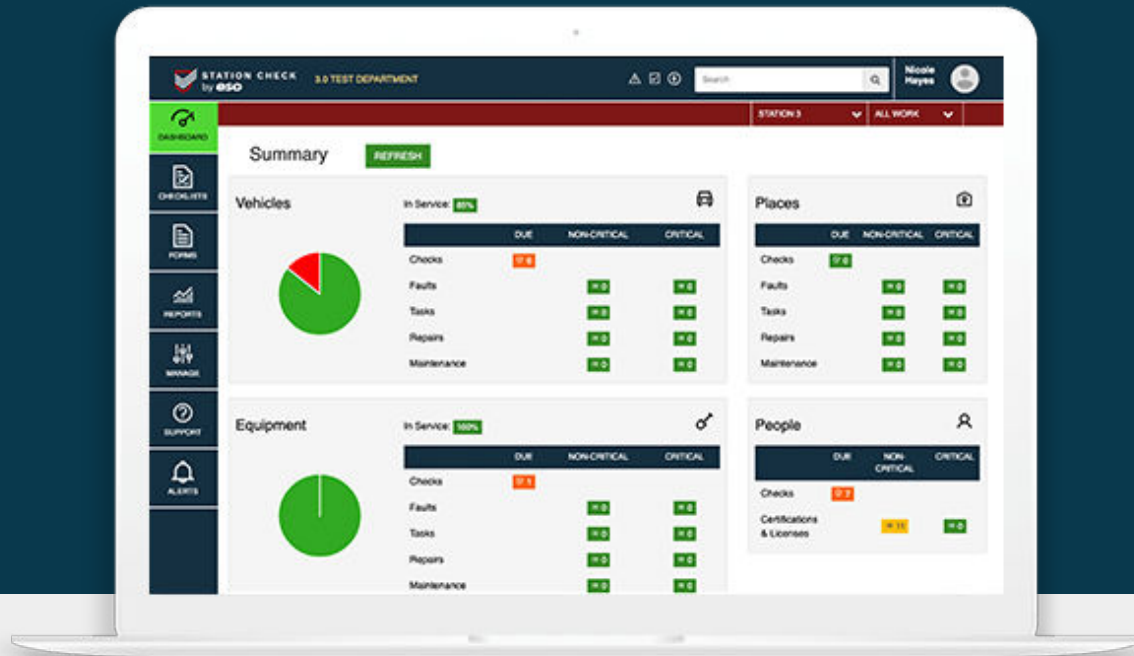

eso

Bring your station's asset management into the 21st century. ESO Asset Management provides the tools you need to track assets from procurement to retirement.

Made for:

FIRE

EMS

REAL-TIME REPORTING.

Track costs, maintenance reports, and more to understand the lifetime value of your assets. Rich reporting and a user-friendly dashboard help you maintain compliance and lower costs.

CONFIGURABLE USER MANAGEMENT.

Keep the deep insights in the hands of administrators and simplify the everyday experience for crew members with granular role assignments.

TRACK YOUR MOST IMPORTANT ASSETS.

Keep tabs on all of your assets by station and location. Once you enter an item into the system, you can easily locate and monitor its status for any device.

MAINTAIN PREPAREDNESS.

Configurable forms track the information needed to keep your assets in top shape. Receive notifications when assets need to be repaired or replaced and track your equipment and gear using our dynamic checklists.

POWERFUL DATA STORAGE.

Add an unlimited number of assets and access 10 years of historical data. Asset Management helps you find key information on all of your important assets with ease.

No more guessing where items are or which items are out of service. Built-in dashboards, user-friendly checklists and rich data sets make it easy to identify trends, make informed budgeting decisions, decrease liability and plan for future growth.
