

# ELECTRONIC HEALTH RECORD

Say goodbye to your old ePCR. ESO Electronic Health Record (EHR) is so advanced, it gives you back more data than you put in.

Made for:

EMS

## ANALYTICS MADE EASY.

EHR arms EMS chiefs, quality officers and administrators with the most useful tool of all: data. With powerful Analytics built in, getting the data you need couldn't be easier.

## SOFTWARE THAT'S ALWAYS UP TO DATE.

With EHR, you'll always get access to the newest online and mobile features. And no upgrades to pay for, ever.

## SO EASY TO USE, IT'S ALMOST FUN.

Created by medics for medics, EHR works intuitively with your workflow. It's so natural-feeling, it's like playing a video game.

## AUTOMATED DATA PROCESSING.

Never again worry about losing data or delaying payments — ESO handles the interfaces with billing and states. So you'll always have peace of mind.

## BETTER TREATMENT DECISIONS, BUILT IN.

EHR is more than a documentation tool — it's packed with reference information and treatment guides that help you make better patient-care decisions in real time.

## COMPLIANT WITH YOUR STATE'S REQUIREMENTS.

EHR meets or exceeds all NEMESIS Version 3 and state-level requirements — no more worrying about compliance.
