# ELECTRONIC HEALTH RECORD

eso

Say goodbye to your old ePCR. ESO Electronic Health Record (EHR) is so advanced, it gives you back more data than you put in.

Made for:

EMS

ANALYTICS MADE EASY.

EHR arms EMS chiefs, quality officers and administrators with the most useful tool of all: data. With powerful Analytics built in, getting the data you need couldn't be easier.

SOFTWARE THAT'S ALWAYS UP TO DATE.

With EHR, you'll always get access to the newest online and mobile features. And no upgrades to pay for, ever.

SO EASY TO USE, IT'S ALMOST FUN.

Created by medics for medics, EHR works intuitively with your workflow. It's so natural-feeling, it's like playing a video game.

AUTOMATED DATA PROCESSING.

Never again worry about losing data or delaying payments — ESO handles the interfaces with billing and states. So you'll always have peace of mind.

BETTER TREATMENT DECISIONS, BUILT IN.

EHR is more than a documentation tool — it's packed with reference information and treatment guides that help you make better patient-care decisions in real time.

COMPLIANT WITH YOUR STATE'S REQUIREMENTS.

EHR meets or exceeds all NEMSIS Version 3 and state-level requirements — no more worrying about compliance.
