

ELECTRONIC HEALTH RECORD

Say goodbye to your old ePCR. ESO Electronic Health Record (EHR) is so advanced, it gives you back more data than you put in.

Made for:

FIRE

SO EASY TO USE, IT'S ALMOST FUN.

Created by medics for medics, EHR works intuitively with your workflow. It's so natural feeling, it's like playing a video game.

SOFTWARE THAT'S ALWAYS UP TO DATE.

With EHR, you'll always get access to the newest online and mobile features. And no upgrades to pay for, ever.

BUILT-IN VALIDATION.

EHR ensures report writers include required fields including signatures, narrative, patient information and other critical data in their record submission which reduces rejection rates and keeps data clean for QA/QI.

AUTOMATED DATA PROCESSING.

Never again worry about losing data or delaying payments — ESO handles the interfaces with billing and states. So, you'll always have peace of mind.

SAVE TIME WITH INCIDENTS INTEGRATION.

Never fill out multiple reports for the same incident again. No matter who fills out the report, EMS or fire, the information is easily exchanged between EHR and Incidents.

COMPLIANT WITH YOUR STATE'S REQUIREMENTS.

EHR meets or exceeds all NEMIS Version 3 and state-level requirements — no more worrying about compliance.
