# ESO FIRE INCIDENTS

Take charge of COVID-19 documentation with ESO Fire Incidents. New features designed to keep your crew safe, highlight the impact of COVID-19 in your community and relay critical information are all just a few clicks away.

## Keep Crew Safety a Priority

Your frontline staff now routinely interacts with suspected or confirmed COVID-19 patients. While patient safety and care is paramount, the safety and wellness of providers is an essential component of COVID-19 response. Use ESO Fire Incidents to evaluate suspected or confirmed provider exposures and provide essential information regarding the potential need for quarantine protocols. Create daily check-in's by enabling a pre-shift screening that tracks symptoms and interactions indicative of COVID-19.

## Document PPE Usage

Measure personal protective equipment use in your fire department to understand reuse and supply levels. You can record multiple types of PPE including N95 masks, P100 masks, surgical masks, gloves, eye protect and protective gowns within the Unit section of ESO Fire Incidents. Use the information you collect to determine high utilization items and appropriate order amounts.

## Create COVID-19 Plus-One Codes

Allow tracking of COVID-19 related events through custom plus-one codes. Easily add codes for flu-like symptoms and other COVID-19 indicators. Any plus-one codes you add are reportable through ESO Ad-Hoc.

## Track COVID-19 Exposures

Record potential exposures to COVID-19 to understand risks to your crews and enable your departmental protocols. All of the data you collect on exposures is auditable for identifying trends and keeping your crews safer.

### From a Company You Trust.

At ESO, we strive to improve health and safety through the power of data, and we believe arming those who protect our communities with the ability to obtain powerful, life-saving data is invaluable.
