

FEATURE HIGHLIGHT

Do more with ESO SCHEDULING

Take charge of COVID-19 in your department with ESO Scheduling. New features designed to keep your crew safe, deploy your COVID-19 policies and relay critical information are all just a few clicks away.

Keep Crew Safety a Priority

Your frontline staff now routinely interacts with suspected or confirmed COVID-19 patients. While patient safety and care is paramount, the safety and wellness of providers is an essential component of COVID-19 response. Use ESO Scheduling to track suspected or confirmed provider exposures and provide essential information regarding the potential need for quarantine protocols. Using the time-clock function, you can create daily check-in's by enabling a pre-shift screening that tracks symptoms and interactions indicative of COVID-19.

Communicate with Ease

Keep crews in the loop on COVID-19 and other key updates with ESO Scheduling's Message Center. You can send text messages in bulk, add attachments and even verify receipt of any messages you send to ensure all eyes read critical information shared.

Manage Quarantine Scheduling

Easily flag employees as quarantined and prompt removal from the schedule. You can choose the number of days for your quarantine period to reflect your agency's protocols and then re-add employees back into the system when it's time to return to the station.

Enable COVID-19 Leave Policies

Stay on top of policy changes and make sure your agency is compliant with local, state and national rules. As changes occur you can update them for your own department by using the custom earning codes feature. For example, to ensure compliance with the recently enacted Families First Coronavirus Response Act (FFCRA) simply add a new code to your custom earning codes list and you'll be set to provide additional leave as regulate.

From a Company You Trust.

At ESO, we strive to improve health and safety through the power of data, and we believe arming those who protect our communities with the ability to obtain powerful, life-saving data is invaluable.
