

INVENTORY

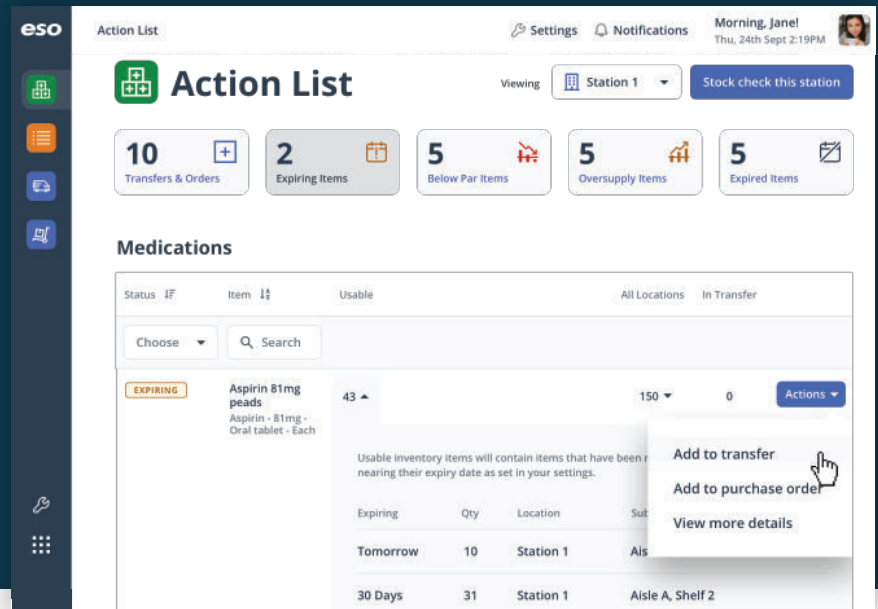

SECURE, INTEGRATED INVENTORY MANAGEMENT

Spend less time getting ready
and more time **being** ready.
Take control of your EMS
supplies with refreshingly
simple ESO Inventory.

Made for:

EMS

TAKE CONTROL OF YOUR SUPPLIES

Gain true visibility and avoid running out of stock with software that streamlines and integrates EMS inventory processes. Know what's in each rig, what's expiring soon, what to transfer, and what to order with a data-driven system that connects it all.

SURPRISINGLY EASY

Inventory management doesn't have to be complicated. Designed to make managing EMS supplies and medications as effortless as possible, ESO Inventory's uncomplicated and intuitive design is easy for everyone to learn and to use.

ePCR INTEGRATION: A GAME CHANGER

The key to driving operational efficiency while assuring vehicles remain stocked is here! Imagine recording a treatment delivered on a call and reviewing a list of supplies associated with it. Simply confirm and they're removed from vehicle inventory. Now that's working smart.

SEAMLESS INVENTORY AUTOMATION

No more relying on scribbled notes and frequent recounts to restock your rigs — or eyeballing supplies to reorder them. Managing EMS inventory is efficient and reliable with ePCR integration, action lists, and reorder point monitoring.

EXPIRATION PREVENTION

Expired meds are a waste of funds that can disrupt treatment and impact patient outcomes. ESO Inventory flags aging medications in specific locations so you can shuffle them for use before they expire. Any meds that do expire are automatically flagged.

Bound Tree

STREAMLINED PURCHASING

Order directly from ESO Inventory via integration with our medical supply partner and gain clear visibility into restocking status.
