# ON-DEMAND LEARNING

eso

Our self-paced, online learning platform provides anytime, anywhere access to ESO software training. Managers and admins can also assign and track courses to ensure their teams know how to use every ESO tool at their disposal.

Made for:

EMS

FIRE

HOSPITAL

ANYTIME, ANYWHERE

With ESO On-Demand Learning (ODL), staff can train whenever it's convenient, wherever there's an Internet connection. Get access to our growing online catalog of interactive courses, recorded virtual training, and registration for live instructor-led training through an affordable annual subscription.

TRANSPARENTLY EASY

It's never been easier to manage and receive training than with ESO On-Demand Learning. Context-sensitive help, a search bar, and a virtual coach assist users while they work. Learning cards, dashboards, calendars, and notifications keep everyone current on progress and deadlines.

SUITABLE FOR ALL STAGES

It's your choice. Use ESO On-Demand Learning to onboard staff, refresh skills, train on new features, and as a tool during your software rollout. However you choose to use it, the flexibility of on-demand training will simplify the process and reduce the burdens on staff.

LOGISTICS-FREE TRAINING

Software training doesn't have to be a logistics nightmare. With ESO ODL, there's no need to juggle schedules, interrupt shifts, or pay overtime for training. And because we know things don't always go as planned, learners can even pause courses to resume them later. Now that's convenient.

VALIDATED LEARNING

Training that isn't applied isn't effective. Each ODL course features quizzes to provide assurance that lessons are actually learned. Management visibility into course progress and completion also helps ensure your staff meets its training goals.

Learn more about how ESO ODL works in this interactive course, now.
