

eso INVENTORY MANAGEMENT

Secure and simple inventory for daily EMS work routines.

Spend less time getting ready and more time being ready. Take control of your inventory with refreshingly simple and dynamically modern Inventory Management.

Made for:

EMS

FIRE

The screenshot displays the ESO Inventory Management web application. On the left is a dark sidebar with a menu including 'Action Now', 'Inventory List', 'Transfers', 'Orders', and 'Portable Assets' (which is highlighted). The main content area is titled 'Manage Portable Assets' and shows a list of actions: 'Overview', 'Check into safe' (selected), 'Check out of safe', 'Swap', 'Refill', 'Start shift Pick up', 'Handover', 'Stock count', and 'Rassign vehicle'. The 'Check into safe' section is active, showing 'Step 1 of 2'. It prompts the user to 'Select a secure location to check Lockbox5 into'. A table lists the 'Portable Asset' as 'Lockbox 5', 'Location' as 'Amb1500', 'sublocation' as 'Vehicle-safe', and 'Assigned to' as 'David Jones'. Below this, there's a dropdown for 'Person checking in lockbox5' with 'David Jones' selected. Further down, it says 'Check in to a secure location' and 'Select location and sublocation you are checking lockbox5 into:'. There are two dropdowns: 'Station' (selected 'Station 12') and 'Sublocation' (selected 'Station - safe'). A section 'Manage your seal number' shows a lock icon and the text 'Our records show this portable asset is sealed'. At the bottom, it asks to 'Seal number' and 'Please confirm your seal number' with a text box containing 'AD-234546'.

Balance cost control and medication availability.

Minimize waste and optimize your supplies by moving expiring medications to locations that need them and avoid overstocking shelves.

Streamline the replenishment process with key integrations.

Simplify your ordering and restocking process by directly accessing vendors like Life-Assist and Bound Tree through our platform, where you can see pricing and receive tracked order updates – all in one place.

Improve visibility and readiness with real-time inventory levels.

Get your hands on real-time inventory level insights for all locations, their restocking requirements, and reorder status.

Some favorite features in the single platform:

- ✓ ePCR and ESO EHR integrations – the real key to modern inventory management!
- ✓ Controlled substance tracking
- ✓ Real-time insights
- ✓ Reorder status
- ✓ Supply vendor integrations made easy with Bound Tree and Life-Assist
- ✓ Stock checks
- ✓ Action lists
- ✓ Modern workflow
