Take your data to the next level with a Snowflake Reader Account located within ESO Insights. Snowflake, an analytic data cloud warehouse, stores all ESO Suite data in a highly scalable, secure, and HIPAAcompliant environment. The ESO Snowflake Reader Account enables you to explore and export data through customized exports and views. With direct access to your ESO cloud database, you can directly connect to a 3rd party business intelligence tool or use the Snowsight User Interface.

Made for:

**EMS** 

FIRE

## Connect your own reporting tool and directly pull data from your Snowflake database.

Query your data and produce outputs in ESO's browser-based SQL editor or through a business intelligence tool. You can also pipe data directly into an enterprise data warehouse to combine datasets across your organization. Use PowerBI, Tableau, or other business intelligence tools to efficiently analyze pre-scrubbed and formatted data with a well-documented data structure.

### Integrate your ESO Suite data sources with external data.

Quickly and reliably mine and analyze your ESO data to gain insight into your performance and surface opportunities. Drive better health and business outcomes by seeing where you stand compared to local and national benchmarks.

## Gain immediate access to your data cloud for critical extracts and configurable reports.

Enjoy simple, efficient analysis, no matter your organization's setup. Use SQL to directly query data, and eliminate the need to invest in additional tools or infrastructure. Snowflake Reader provides direct access to your input data optimized for analytics and bulk extraction, giving you a robust foundation for your reporting needs.

# Snowflake is HIPAA, PCI DSS, SOC 1 and SOC 2 Type 2 compliant, and FedRAMP authorized.

Your data is stored safely and securely - ready for when you need it.

Interested in learning how ESO Snowflake Reader can uplevel your data in ESO Insights? Reach out to your ESO sales or customer success rep.
